

IA Study to Student experiment transformation template

Original study

1. What is the hypothesis of the study?
2. What are the IVs of the study? Number and list each and explain how they are operationalized.
3. What are the DVs of the study? Number and list each and explain how they are operationalized.

Classroom study - Please note - all IB Psychology IA requirements described in the IB Psychology guide must be followed.

4. What elements of the original study would present a challenge for simplified recreation in a classroom? How might these challenges be overcome?
5. What IV will you use? Why did you select this IV? How will this be operationalized in the classroom setting?
6. What DV will you use? Why did you select this DV? How will this be operationalized in the classroom setting?
7. What type of study will you conduct?
8. Briefly explain, in bullet form, how the study would be conducted in a classroom setting in 10 minutes.
